ArcGIS Pro Professional GIS

Realistic Rendering

3D Object Feature Layers

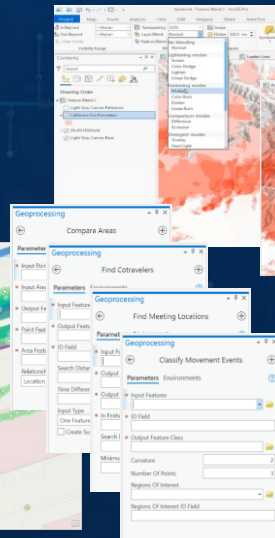

Voxels

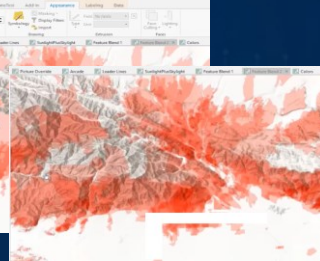

Linear Reference Editing

Movement Analysis Tools

Layer and Feature Blending

New & Improved

- Image Analysis
- Linear Reference Editing
- GNSS (GPS) Device Support
- Movement Analysis
- Layer Blending
- Mobile Geodatabases
- Voxel Layers
- ModelBuilder
- Non-Spatial Objects
- Cloud Based Databases

2021

Coming

- Data Engineering
- Floor Aware Mapping
- Machine Learning for Point Clouds
- Suitability Model Sharing
- IFC Support
- Aviation Charting
- Geoprocessing Leveraging Spatial Databases

ArcGIS Pro & Extensions

Advanced Mapping, Visualization, Editing and Analysis

Bringing Powerful Spatial Tools and Location Services to All Developers

What we just showed

ArcGIS Pro

- New tools and techniques make creating better looking and more informative maps easier than ever
- Streamlined data editing workflows in both 2D and 3D

BIM & GIS

- The continued work of Esri and Autodesk provides new tools and capabilities for information exchange between BIM and GIS systems
- Information exchange is facilitated by ArcGIS integration with Autodesk InfraWorks, Civil 3D and BIM 360 Cloud

3D

- Enhanced 3D data integration, visualization and analysis capabilities
- Large 3D projects in the Baltic states: Estonia, Lithuania

ArcGIS Online

- Complete, SaaS solution that complements the capabilities of ArcGIS Pro
- ArcGIS Dashboards are out of beta - take advantage of new capabilities and performance improvements
- Application builders (Experience Builder, Instant Apps, etc,) - transform your data into compelling web apps without writing a single line of code

ArcGIS Image

- Manage, visualize, and analyze imagery collections in the cloud
- Save on infrastructure costs and maintenance
