ArcGIS Online

What's new in ArcGIS Online (June 2022)

Announcements
June 22, 2022

Bern Szukalski

ArcGIS Online lets you understand the world around you by using interactive maps to connect people, locations, and data. You get smart, data-driven styles and intuitive analysis tools that deliver location intelligence. ArcGIS Online gives you the ability to make maps and apps to share your insights with your organization or the world. You can use it as a complete, cloud-based solution or to extend and complement the capabilities of ArcGIS Pro and ArcGIS Enterprise.

Don't have an ArcGIS account? See [Create an ArcGIS Account](#).

The June 2022 update includes new functionality in Map Viewer plus other enhancements and new capabilities throughout the ArcGIS Online website. Highlights are provided below.

PRAKTIILISI NÄITEID

valik ArcGIS Online uuendusi (juuni 2022 – veebruar 2023)

KOOLITUSED JA SEMINARID

MAI / JUUNI 2023	
3.-4. mai	Ruumiandmete haldamine ja levitamine ArcGIS Enterprise keskkonnas
5. mai	Interaktiivsed kaardirakendused I
5. mai	ArcGIS Insights algkursus
8. mai	Kaugseireandmete kasutamine ja analüüsid ArcGIS-is
9.-11. mai	ArcGIS Pro: Esmased töövõtted ja funktsioonid
12. mai	Välikaardistamine ja tööde haldamine ArcGIS-ga
16.-18. mai	Python-skriptide kasutamine geotööstustes
19. mai	Veebikaardid ja nutirakendused edasijõudnutele
23.-25. mai	ArcGIS Pro: Töövõod ja GIS-analüüsid
2. juuni	Interaktiivsed kaardirakendused I
12. juuni	3D andmetega töötamine ArcGIS-is

Spatial Analysis in ArcGIS Online Map Viewer
Webinar
May 9, 2023 | 9:00 a.m.-10:00 a.m. (PT)

Solve problems with analysis in ArcGIS Online

Spatial analysis uses location as a connective thread to help the world understand where things are happening, how they are related, and where patterns exist. In addition to mapping, analysis is an integral part of ArcGIS Online. This webinar introduces the spatial analysis and charting experience in ArcGIS Online Map Viewer. We will demonstrate different analysis workflows including exploratory data analysis using charts, feature analysis, raster analysis, and new functionalities such as analysis history.

In this 60-minute webinar, you will learn how to:

- Explore data using data visualization techniques such as charts.
- Use analysis tools in ArcGIS Online Map Viewer to solve spatial problems.
- Share your analysis with others by leveraging analysis history, ArcGIS Instant Apps, and ArcGIS StoryMaps.

Esri's MOOC Program

Massive open online courses show how to apply geospatial thinking and create data-driven insight that improves organizations, communities, and the world.

These free online courses are for anyone who wants to build new skills, grow professionally, and expand their horizons. Courses range from four to six weeks and are self-paced. Have fun, explore a new topic, get hands-on practice with the latest ArcGIS software, and earn a certificate of completion.

View common questions about MOOCs.

MOOC
Transform AEC Projects with GIS and BIM
Course opens May 5, 2023
4 Weeks
Free

MOOC
Spatial Data Science: The New Frontier in Analytics
Course opens Aug 30, 2023
6 Weeks
Free

MOOC
Imagery in Action
Course opens Sep 20, 2023
6 Weeks
Free
