about

Ability to locate difficult to find objects faster

No need to use multiple devices to find an object
Specifies the exact location on the map in case there are inaccurate addresses given

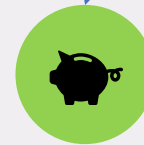

We reach the customer faster

We see the necessary information about the client and the task and call the client with the click of a button

Time savings

~350 hours per month

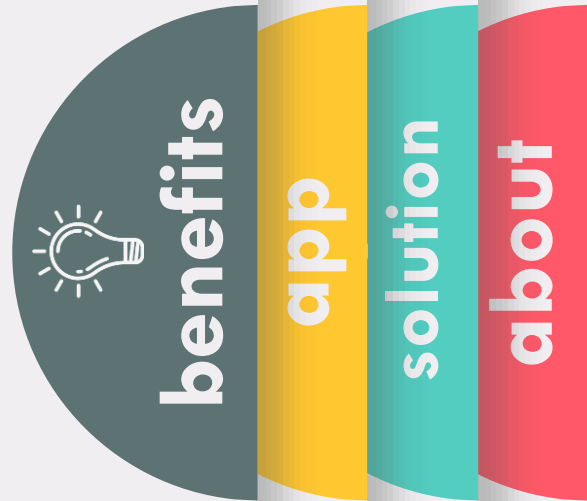

Coin savings

No need to buy / upgrade additional navigation devices

~3500 eur

Plug and Play „FTW“

The simplest possible installation - saves resources

Anticipate the reserve of resources

We have developed a tool that does not fit the existing equipment

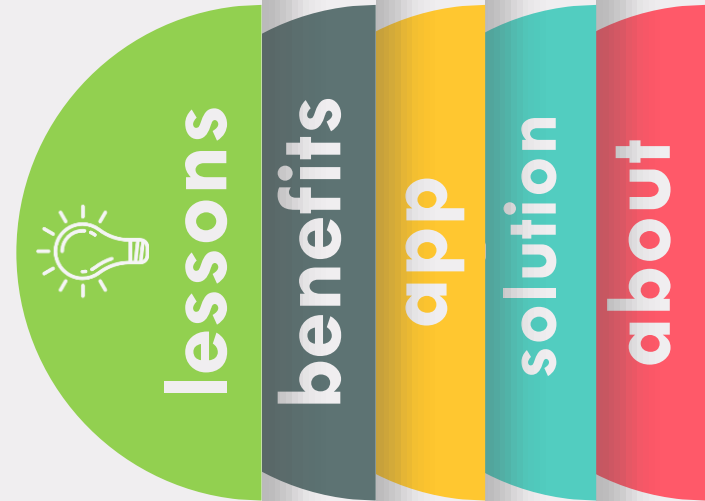

End users knows best

Ask and listen to the opinion of the end users

Once step at a time to climb a mountain

Develop the system in stages
There is no elevator for Mt. Everest... yet!

Planing

Possibility to plan an engineer's working day and optimal route

Readings

Possibility to take a readings of metering devices

Future ideas

The boundaries are only imagination
